

Rolba 3000

**EVERY SNOW.
EVERY APPLICATION.**

ZAUGG AG. Expertise, quality, and patented solutions.

ROLBA 3000

The Rolba 3000 is the ideal machine for use on highways and airport runways. With an impressive throwing range of up to 50 meters, it removes snow quickly and efficiently from the clearing area. Thanks to fold-out side wings, the clearing width can be flexibly extended to up to 3.2 meters, allowing even large areas to be cleared effortlessly.

Robust, powerful, and reliable - the Rolba 3000 keeps paths clear even in extreme winter conditions.

Technical data Rolba 3000

Clearing capacity	up to 5'300 t/h
Clearing width	2'500 mm
Clearance height in one pass	1'500 mm
Throwing distance	bis zu 50 m
Turning radius	5.96 m
Clearing speed	0.3 - 40 km/h
Engine power	433 kW / 588 hp
Fuel capacity	620 litre
Total weight	11'500 kg

Optional accessories

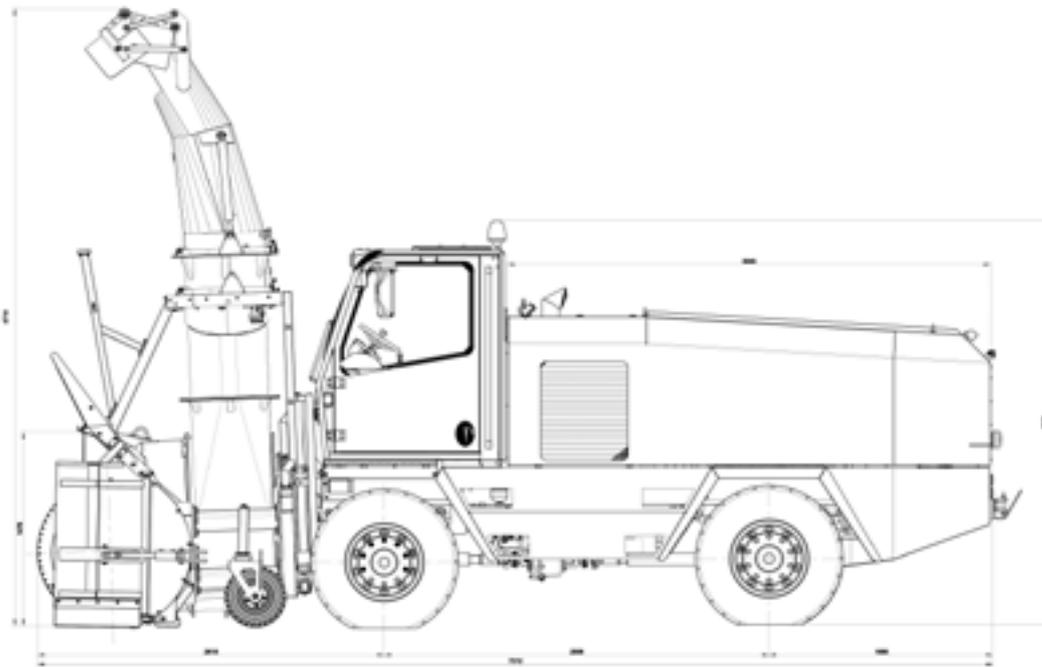

The innovative chute bracket allows for maximum flexibility: from wide, direct discharge on both sides to precise unloading via the loading chute.

Support wheels and plastic scraper bars are often used for fast and gentle snow removal at airports to prevent surface damage to sensitive pavement structures.
