ROLBA 500

The Rolba R500 is unique in terms of size and power. The self-propelled snow cutter blower is equipped with a diesel engine that meets the current EU Stage V standards. It is conveniently operated by using the built-in joystick and display. Thanks to the front, rear, all-wheel and crab steering it is possible to clear snow in tight places. Additionally various options and clearing widths are available to choose from. Apart from direct ejection, various ejector tube lengths are available and even a telescopic ejector tube. The Rolba 500 can be prepared for multiple use, for example, with regard to a boom mower. So the machine is also ideal for an use during summer season. The hydraulically tiltable bonnet allows easy access to the engine compartment for easier maintenance.

TECHNICAL DATA

Rolba 500 with two-stage ZAUGG snow blower

| | |
|-----------------------------|--------------------|
| Clearing capacity | 1,800 t/h |
| Clearing widths | 180 / 200 / 210 cm |
| Clearing height in one pass | 130 cm |
| Casting distance | up to 40 m |
| Turning radius | approx. 4 - 8 m |
| Clearing speed | 0.15 - 40 km/h |
| Engine output | 170 kW |
| Fuel tank | 150 l |
| Total weight | approx. 8,000 kg |

TECHNICAL DATA

Rolba 500 with boom mower

| | |
|------------------------------------------------------------------------|--------------------------------------------------------|
| Attachment plate type | VSS-A / F1 |
| Maximum output at the PTO stub | 75 kW |
| Direction of rotation of PTO (shaft viewed from the front on the stub) | left (counterclockwise) |
| Speeds at PTO shaft | 540 rpm @ 1350 rpm diesel 750 rpm @ 1876 rpm diesel |
| PTO shaft profile | ZWP 1 3/4" 6-part acc. to DIN 9611 |
