# ROLBA 1500

The self-propelled snow cutter blower is equipped with a diesel engine that meets the current EU Stage V standards. It is conveniently operated by using the built-in joystick and display. Thanks to the front, rear, all-wheel and crab steering it is possible to clear snow in tight places. The hydraulically tiltable engine hood allows easy access to the engine compartment for easier maintenance. The Rolba 1500 can optionally be equipped with a pre-cutter to remove overhanging snow drafts.

## TECHNICAL DATA

### Rolba 1500

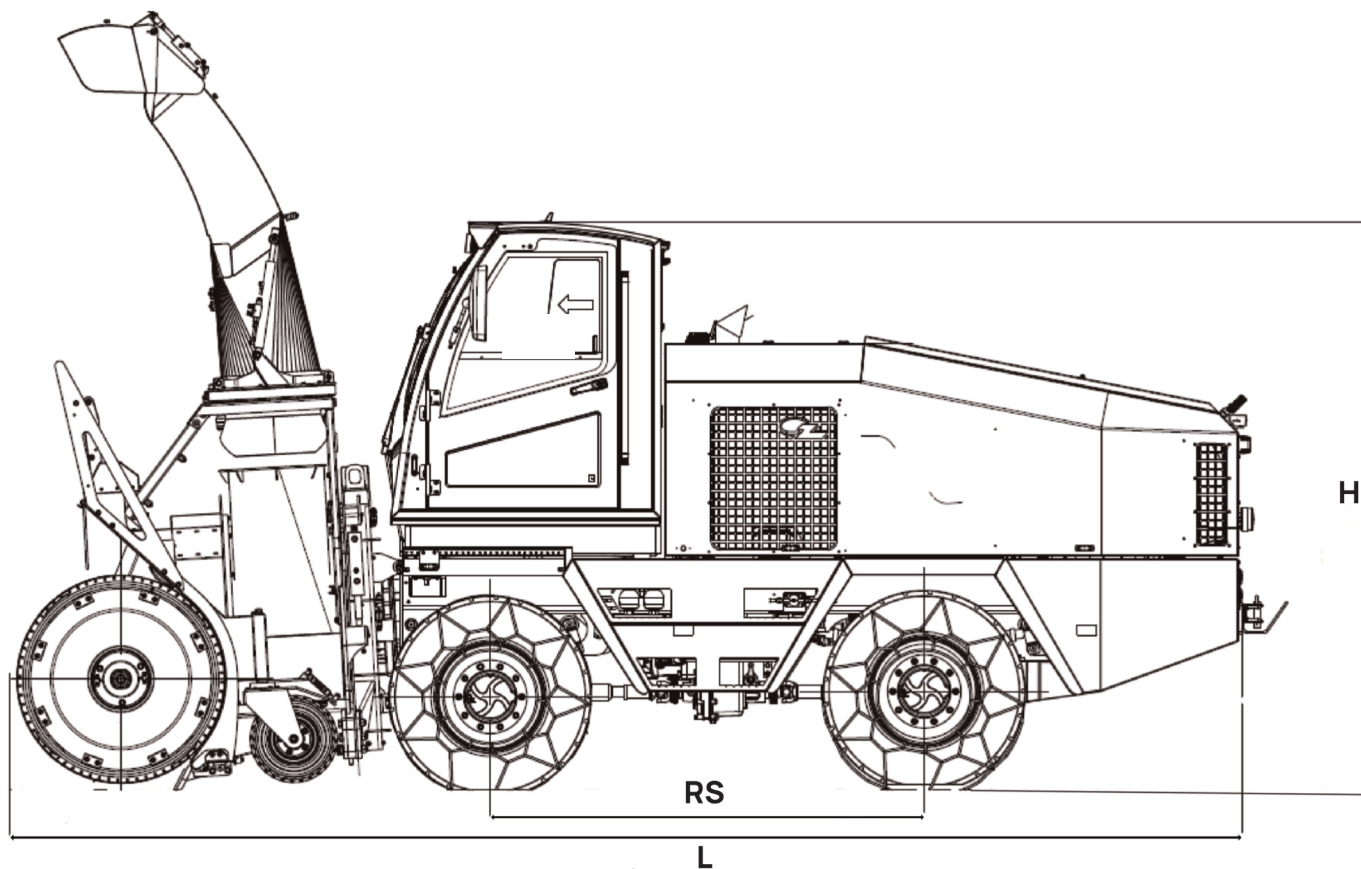

Clearing capacity	metric 3'500 t/h (short 3'858 t/h)
Clearing widths	2'500 mm (98.4 in)
Clearing height in one pass	1'500 mm (59 in)
Casting distance	40 m (131.2 ft)
Turning radius	12 m (39.4 ft)
Clearance speed	0.3 up to 40 km/h
Engine output	353 kW / 456 HP
Fuel tank	700 l (184.9 gallons)
Total weight	12'000 kg (26'455 lbs)

### Cabin inner and outer

# ROLBA 1500

## Dimensions Rolba 1500

## Value

H = Total height

3'200 mm (125.9 in)

RS = Wheelbase

2'300 mm (90.5 in)

L = Total length

6'500 mm (255.9 in)

Vehicle width

2'200 mm (86.6 in)

Working width

2'500 mm (98.4 in)
