MASTERS OF SNOW

Rolba 1500

ROLBA1500

The self-propelled snow cutter blower is equipped with a diesel engine that meets the current EU Stage V standards. It is conveniently operated by using the built-in joystick and display. Thanks to the front, rear, all-wheel and crab steering it is possible to clear snow in tight places. The hydraulically tiltable engine hood allows easy access to the engine compartment for easier maintenance. The Rolba 1500 can optionally be equipped with a pre-cutter to remove overhanging snow drafts.

TECHNICAL DATA

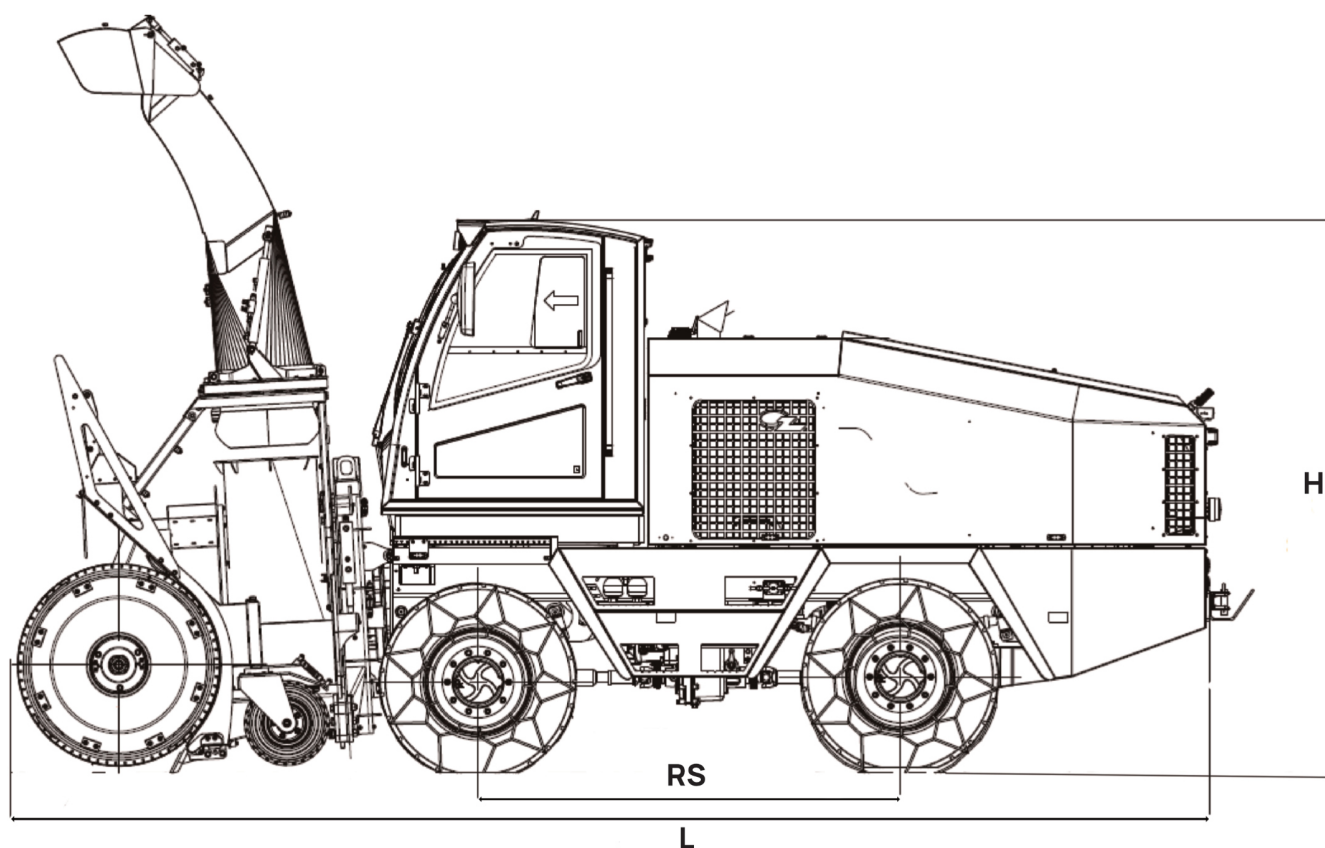

Rolba 1500

| | |
|-----------------------------|------------------------|
| Clearing capacity | 3'500 t/h |
| Clearing widths | 2'500 mm (98.4 in) |
| Clearing height in one pass | 1'500 mm (59 in) |
| Casting distance | 40 m (131.2 ft) |
| Turning radius | 12 m (93.4 ft) |
| Clearance speed | 0.3 bis 40 km/h |
| Engine output | 321 kW / 436 HP |
| Fuel tank | 700 l (184.9 gallons) |
| Total weight | 12'000 kg (26'455 lbs) |
