# SNOWBEAST

Go  
your  
Way!

[www.zaugg.swiss](http://www.zaugg.swiss)

The Snowbeast is a hand-guided, tracked snow blower with high power density. Thanks to the arrangement of the blades above one another, the Snowbeast records a clearing height of up to 120 cm. By means of an ergonomic 2-lever joystick control, the machine can be easily operated. The Snowbeast is used in snow parks when equipped with a Tubing Designer and also in fun parks. It is also ideally suited for clearing terraces at mountain restaurants, hiking trails or smaller parking lots.

## TECHNICAL DATA
